Nathan Meyer
PRC Environmental Management, Inc.
650 Minnesota Avenue
Kansas City, Kansas 66101

Dear Mr. Meyer:

As per our discussion of the Knapheide Environmental Benefit Expenditures (EBE) Project, Work Assignment No. R07068, held September 15, 1992, I request that you specifically review the facility prepared closure plan as part of the "Review of EPA and State Files, (2.1.1)" and provide me written comments on the ability of the sampling proposed, to determine if releases have occurred at either unit (the storage or incinerator unit), that could require activities where an expenditure could be claimed under the EBE.

I realize that this may be more detailed than was projected in the statement of work. I expect this to take approximately four (4) hours. If further levels of effort are needed to supplement the project, I will consider this additional work as justification for additional hours.

If you have any questions, please contact me.

Sincerely yours,

Ruben McCullers
Environmental Scientist
